

**“VJ” USER’S COMMENT: 85%** of users who purchased comment :  
**they wish they could have used them much earlier!**

1. [Show the picture: Great persuasive power!] from worker of pipework cleaning./Fukuoka city  
Very effective to explain to the customer why pipes are needed to clean by showing dirt inside the pipe with display.

We had always a difficulty to convince customers about the need to clean inside the pipes.  
With VJ, we can show the actual picture of “BEFORE” and “AFTER” cleaning by its display.

2. [Should have used it much earlier!] from heat exchanger maker/Nagoya city

I wish I knew and used it much earlier!

I am working for maintenance like checking cans.

We used to outsource filming when required or lease and it cost a lot.

We considered to purchase a borescopes but we couldn’t afford several million Yen.

Trying the demonstration unit, we got quite satisfied with its quality and much lower price and jumped to purchase it.

3.[Maintenance: Time cut from half day into 1hour!] from large machining maker /Yokohama city

It used to take half day and we had to demount the machine for maintenance machine tools.

Especially to check inside reduction gears, we had to put our hands in the facilities which always left us problems in time and safety.

We are very satisfied withVJ as maintenance time minimized into 1hour with safety!
